Get on the Cellular Superhighway

The "Lambo" of Multicarrier SIM Technology

- **Exciting options including carrier priority**
- **Fast over-the-air (OTA) updates**
- **Powerful network tuning**
- **Meticulous application control**
- **High-performance security with DPI**
- **A dreamy dashboard with analytics**

Advantix SmartSIM provides universal WAN connectivity with auto-failover by seamlessly connecting to leading carriers including AT&T, Verizon and T-Mobile in the U.S., and 600+ providers globally. It is the "Lambo" of multi-carrier SIM technology with millisecond turbo carrier switching and feature-rich functionality.

Advantix SmartSIM is a multi-carrier SIM that connects to six domestic carriers – Verizon, AT&T, T-Mobile, US Cellular, Union Telephone Company and Cellular One – in the U.S., and 600+ providers globally. There is no need to choose a carrier or worry about pervasive uptime because the SIM enables the device to provide auto failover. In the event of a total loss in carrier signal/coverage, the device will automatically hunt for the next-available carrier as a replacement network.

SmartSIM ordering is processed via our TLM (Telecom Lifecycle Manager) SaaS platform and integrated with BLITZ™, an API that enables end-to-end procurement with carrier systems. This provides a single entry point for fulfillment and enables you to issue requests in real time. It also allows you to manage an entire fleet of wireless devices, carrier services, contracts and monthly spend in a single system, as well as access analytics and real-time reporting that can improve business outcomes.

WHY SMARTSIM-ENABLED HARDWARE DEVICES?

You get...

Lower Connectivity Costs
Competitive, pre-negotiated carrier pricing reduces total spend.

Universal Coverage
SmartSIM provides universal WAN connectivity with auto-failover by seamlessly connecting to leading carriers including AT&T, Verizon and T-Mobile in the U.S., and 600+ providers globally.

Superior Security
SmartSIM provides deep packet inspection at the network layer to apply virus, malware and content filtering.

Seamless Ordering and Billing
No need to shop for price, mess with account setup, or manage multiple contracts and invoices.

Robust Reporting/Analytics
Business intelligence in real-time with Advantix's SaaS management platform.

Managed Services
Add-on services are available to manage and optimize lines and activations, track zero-usage devices and deliver cost allocation reporting.

FAQ

WHAT ARE THE AVAILABLE DATA RATE PLANS?

Standard plans include 50MB, 250MB, 500MB, 1GB, 2GB, 3GB, 5GB, 10GB and 20GB.

CAN YOU POOL DATA PLANS?

Yes, each device requires a plan. Plans can be pooled with each other to offer a "buffer" to overages on the overall account.

IS A TERM CONTRACT REQUIRED?

No. Only a deposit of one month's recurring charges, subject to forfeiture if the line is canceled within 12 months.

ARE THERE ACTIVATION FEES?

Yes. There is a one-time fee for SIM activation and account setup.

IS THIS FOR DATA ONLY?

Yes, the SmartSIM solution is for data only applications. If voice/text is required, Advantix has other options.

IS THERE SUPPORT?

Yes. Advantix has experts on staff to support you and make sure you are getting the most out of the solution.
