

# MP RANGER

**MOBILE PRINTER FOR RECEIPT AND LABEL ISSUE  
IDEAL FOR LOGISTICS AND DELIVERY**

MP Ranger is a latest generation mobile printer and represents the evolution of Custom's range of mobile printers. It can print on thermal paper in roll format, either on thermal plain paper or peel-off format labels. Complete with sensors for displaying status and battery level, it allows the printing of 1D and 2D barcodes (QR CODE). It can handle rolls with paper width of 76.2 mm or 80 mm using the special reducer included in the package, and is designed to be used in outdoor working contexts, thanks to the IP54 protection to resist splashing of liquids and dust for use in adverse weather conditions and resistance to falls from 1 meter. The operational equipment is completed by a clip for belt fastening and as an accessory the practical case with shoulder strap is available for greater protection and the cradles, with 1 position for practical charging. MP Ranger can be connected to any mobile device, from simple phones, to specialized terminals, to handheld mobile computers and tablets with Bluetooth® and Wi-Fi® functionality thanks to the Wireless technology. The printer is equipped with different charging options, from simple connection via USB Type-C to positioning on single position charging cradle.
