WindFall Side Mount for iPad

Installation Instructions and Template

Important Note:

A minimum 1.5 inch (38mm) set back from mullion face to the glass is required for an optimal installation in which the front face of the enclosure is flush with the front face of the mullion.

ADA Compliance Guideline

For ADA compliance, the center of the Ethernet cable hole should be no higher than 45 inches above the ground.

Creating The Ethernet Cable Hole

If your Ethernet cable has an RJ45 connector installed, drill a 5/8 inch hole in the position shown.
If you will install an RJ45 connector after the Ethernet cable is drawn through the mullion, a smaller hole can be created.
Selecting Your Mounting Screw Positions

To accommodate various mullion styles, multiple screw hole positions are available. Please select the mounting positions that work best for your mullion.

You may use any screw you see fit for mounting the product to the mullion.

If you choose to use the self-tapping mounting screws provided, we recommend drilling a pilot hole with a #17 drill bit or a 5/32-inch drill bit.
